EDUCATION

Bachelor of Science in Computer Science | Minor in Finance

California State University, Northridge |

Expected Graduation May 2027

GPA: 3.2

EXPERIENCE

CSUN Entrepreneurs Club

March 2026 – Present

Treasurer

- Designed and developed the club website and officer portal independently using HTML, CSS, JavaScript, Firebase Authentication, and Firestore, used by more than ten officers to manage events, announcements, member attendance, and treasury records for roughly 50 members.
- Administer an annual operating budget of \$1,000 to \$5,000, monitoring expenditures and fund allocation across club events and producing financial reports to maintain transparency and accountability.

CSUN Financial Management Association

May 2026 – Present

Vice President of Technology

- Designed and developed the FMA club website using HTML, JavaScript, Firebase Authentication, and Firestore, serving an organization of over 100 members with event information, resources, and club content.
- Implemented Firestore security rules restricting write access to an authenticated, allowlisted set of editors while keeping all content publicly readable without an account.
- Administered editor access controls and ran club communications through Discord and the executive board email.

CSUN Supplemental Instruction Leader

August 2026 – Present

Math 106 (Mathematical Foundations for Non-Calculus Physics) Supplemental Instruction Leader

- Instructed a one-unit study group course for a cohort of 20 students linked to a Math 106 section, facilitating two one-hour sessions per week.
- Attended Math 106 lectures alongside the cohort to identify gaps in understanding, then built each session around those areas, presenting material in new ways and running exam review.

CSUN Dr. Hanzawa Plant Genetics Lab

May 2026 – Present

Undergraduate Researcher, Autonomy Research Center for STEAHM Associate Program

- Constructed small-scale aeroponic growing systems for Seascape strawberries, holding five to six plants each, as part of an ongoing plant genetics research project.
- Set up Raspberry Pi cameras to track root development and overall plant growth and worked on integrating a soil moisture sensor to report wet and dry conditions.

CSUN Student Outreach and Recruitment

October 2025 – Present

Guest Relations Student Assistant

- Assisted 40 to 45 daily visitors at the front desk, managing test check-ins, counselor appointments, walk-ins, and campus tour arrivals while fielding calls on two department phone lines.
- Delivered campus tours throughout the summer, coordinated with schools to schedule group visits, and supported four large-scale recruitment events including CSUN Open House and Admitted Matadors Day.

ACADEMIC PROJECTS

StudyFlow

January 2026 – May 2026

Team Leader

- Led a team of four to build a cross-platform academic productivity application for iOS, Android, web, macOS, and Windows using Flutter, Dart, Firebase, and Firestore.
- Built the backend AI pipeline that generated study guides from student-uploaded course materials and handled debugging across the full codebase.
- Integrated the Canvas LMS API for live course and assignment data, and shipped collaborative scheduling, assignment tracking, and progress analytics, validated with real student testers before launch.
- Resolved merge conflicts across four active branches and delivered the project on time.

Custom Java Array List Implementation

October 2025 – December 2025

Project Coordinator

- Implemented a custom array list data structure in Java from scratch, writing methods for dynamic resizing, element insertion and removal, and index-based access across a set of modular class files.
- Coordinated task distribution across the team and ran code reviews to keep implementations consistent and correct.

8-Puzzle Game

October 2025 – December 2025

C Programming

- Engineered a command-line puzzle game in C using dynamic two-dimensional arrays, move validation, and manual memory management across over 200 lines of documented code, published to GitHub.

SKILLS

Languages & Markup: Java, C, JavaScript, HTML, CSS, Python, Dart

Frameworks & Libraries: Flutter, REST APIs

Databases: MySQL, Firebase, Firestore

Tools & Platforms: Git, GitHub, Bash, Maven, Ubuntu, VS Code, IntelliJ IDEA, Google Workspace, Microsoft Office

Soft Skills: Leadership, Problem-Solving, Public Speaking, Event Coordination, Time Management, Communication
