EDUCATION

Bachelor of Science in Computer Science | Minor in Finance
California State University, Northridge | GPA: 3.2

Expected Graduation May 2027

EXPERIENCE

CSUN Entrepreneurs Club | csun-entrepreneurs.web.app

March 2026 – Present

Treasurer

- Designed and developed the club website and officer portal independently using HTML, CSS, JavaScript, Firebase Authentication, and Firestore, used by more than ten officers to manage events, announcements, member attendance, and treasury records for roughly 50 members.
- Administer an annual operating budget of \$1,000 to \$5,000, monitoring expenditures and fund allocation across club events and producing financial reports to maintain transparency and accountability.

CSUN Financial Management Association | csun-fma.com

May 2026 – Present

Vice President of Technology

- Designed and developed the FMA club website using HTML, JavaScript, Firebase Authentication, and Firestore, serving an organization of over 100 members with event information, resources, and club content.
- Implemented Firestore security rules restricting write access to an authenticated, allowlisted set of editors while keeping all content publicly readable without an account.
- Configured a GitHub Actions workflow for automatic deployment to Firebase Hosting and connected a purchased custom domain to the live site.

CSUN Supplemental Instruction

August 2026 – Present

Supplemental Instruction Leader, Math 106

- Instruct a one-unit study group course for a cohort of 20 students linked to a Math 106 section, facilitating two one-hour sessions per week.
- Attend Math 106 lectures alongside the cohort to identify gaps in understanding, then build each session around those areas, presenting material in new ways and running exam review.

CSUN Dr. Hanzawa Plant Genetics Lab

May 2026 – Present

Undergraduate Researcher, Autonomy Research Center for STEAHM Associate Program

- Construct small-scale aeroponic growing systems for Seascope strawberries, holding five to six plants each, as part of an ongoing plant genetics research project.
- Set up Raspberry Pi cameras to track root development and overall plant growth and integrate a soil moisture sensor to report wet and dry conditions.

CSUN Student Outreach and Recruitment

October 2025 – Present

Guest Relations Student Assistant

- Assist 40 to 45 daily visitors at the front desk, managing test check-ins, counselor appointments, walk-ins, and campus tour arrivals while fielding calls on two department phone lines.
- Deliver campus tours, coordinate with schools to schedule group visits, and support recruitment events including CSUN Open House and Admitted Matadors Day.

PROJECTS

StudyFlow | *Team Leader*

January 2026 – May 2026

- Led a team of four to build a cross-platform academic productivity application for iOS, Android, web, macOS, and Windows using Flutter, Dart, Firebase, and Firestore.
- Built the backend AI pipeline that generated study guides from student-uploaded course materials and handled debugging across the full codebase.
- Integrated the Canvas LMS API for live course and assignment data, and shipped collaborative scheduling, assignment tracking, and progress analytics, validated with real student testers.

Personal Portfolio Website | naveedshirzadiportfolio.web.app | *React, Vite*

October 2026 – Present

- Built and deployed a personal portfolio site with React and Vite, using a component-based architecture to present projects, experience, and a downloadable resume.
- Set up continuous deployment through GitHub Actions so every push to the main branch builds and publishes the site to Firebase Hosting automatically.

Custom Java Array List Implementation | *Project Coordinator*

October 2025 – December 2025

- Implemented a custom array list data structure in Java from scratch, writing methods for dynamic resizing, element insertion and removal, and index-based access across a set of modular class files.

8-Puzzle Game | *C Programming*

October 2025 – December 2025

- Engineered a command-line puzzle game in C using dynamic two-dimensional arrays, move validation, and manual memory management.

SKILLS

Languages & Markup: Java, C, JavaScript, HTML, CSS, Python, Dart

Frameworks & Databases: React, Vite, Flutter, REST APIs, MySQL, Firebase, Firestore

Tools & Platforms: Git, GitHub, GitHub Actions, Firebase Hosting, Bash, Maven, Ubuntu, VS Code, IntelliJ IDEA
